

HICHEM FANTAR

FULL STACK SOFTWARE DEVELOPER

I am an experienced full stack web developer with 2 year experience in creating excellent websites and sharpening my skills.

After my latest and biggest project that targets a nation wide audience, I've developed skills in creating attractive designs, UX friendly interfaces and robust backends.

Combined with several mini projects built during my university years, I'm confident in my ability to adapt to new technologies and market needs.

Always looking for opportunities to challenge myself in innovative projects. Take a look at the contact section below if you'd like to get in touch.

EDUCATIONAL HISTORY

Higher Institute of Technological Studies of Sousse (ISET SOUSSE)

Bachelor of Web Development and Multimedia, 2019 - PRESENT

- Constantly learning new technologies and design patterns

RELEVANT EXPERIENCE

E-Sports TN (web)

(February 2022 - Present)

- As gamers, My friends and I noticed the lack of solutions that allow gamers to gain prizes from playing their favorite e-sports games. This led us to create E-sports TN which is a platform that solves exactly that problem.

- Tech used: **React** (Javascript), **Laravel** (PHP), Riot Games **REST API**, Real Time updates with **Web Sockets**, **Docker**

Crypto Watch (mobile)

(October 2021 - Present)

- The growing global interest in cryptocurrency has drawn me to learn more about the technology which led to develop a simple application that displays crypto prices and a history chart for each cryptocurrency.

- Tech used: **React Native**, Google **Firebase**, Coin Gecko **REST API**

Internship Management system (web)

(August 2021 - October 2021)

- A website developed during my latest internship at Proxym, It aims to facilitate internship management for HR employees by providing a centralized platform to create internship relationships between supervisors and their associated interns. Also a Dashboard that provides statistics on platform activity and gender quotas.

- Tech used: **React**, **Nest** (NodeJS), **Swagger** (OpenAPI Specification)

Zabbix Machine Health Monitoring (Linux Framework)

(January 2021 - March 2021)

- Companies have to maintain their hardware and make sure it's always running in good condition, Instead of manually checking for issues, Zabbix provides a framework for monitoring machine conditions and an interface to interact with machines wirelessly. The team I worked with and I have managed to deploy Zabbix on a virtual network and set up alerts if any of the connected machines experienced problems.

- Tech used: **Zabbix**, **Linux**, **SQL**, **VMware Workstation**
